

THE A-LIST SECRET TO A PERFECT TAN

February 2007

Everyone feels great with a sexy touched-by-the-sun glow but before you end up looking like a leather handbag after endless days on the beach, be sun savvy and fake it with **Xen-Tan**, hailed the 'must have' sunless tan by celebrities such as *Drew Barrymore*, *Heidi Range (Sugarbabes)* and *Nicolette Sheridan*.

Hot off the shores of the US, this revolutionary, self tanning line-up has been specifically developed to overcome those dreaded drawbacks commonly associated with fake tans. Carefully formulated with olive-undertones, it's guaranteed to leave you with a colour that's smooth and natural (not orange) for a 'I've just been in the sun' golden glow. The streak-free, long lasting formulations are easy to apply and contain nourishing moisturising ingredients for an even (won't gather at the elbows and ankles) can't-tell-it-from real glow. Suitable for all skin types (perfect for the fairest of skins), the range is formulated with a gorgeous cherry-almond scent that puts pay to the not-so-great smelling formulations of yesteryear. This perfect bronzer won't look pink or rusty on even the fairest skins.
